

UI/UX Design Brief & Stitch MCP Specification

App Name:

CloudGuard GRC (AntiGravity Platform Architecture)[cite: 1]

Document Version:

1.0.0 (UI/UX System, Component Design Tokens & Stitch Prompts)

Target Aesthetic:

High-Density Enterprise Cybersecurity Dashboard (Dark/Light Seamless Support) [cite: 1]

Integration Standard:

Tailored for Generative UI rendering via **Stitch MCP Server**

1. Design Style & Overall Aesthetic

- Aesthetic Persona:** Modern Enterprise Cybersecurity Posture Management (CSPM) & GRC Automation[cite: 1]. Sleek, professional, precise, and authoritative—resembling high-end platforms like Wiz.io, Datadog, and Linear.app.
- Visual Tone:** High data-density with minimal noise. Interfaces must prioritize fast triage, clear risk urgency, and zero visual clutter[cite: 1].
- Theme Modes:**
 - Dark Mode (Default/Recommended):** Deep slate/navy background (#090d16) with high-contrast glowing accents for risk scores and alert badges.
 - Light Mode:** Cool gray canvas (#f8fafc) with dark slate text (#0f172a) and subtle card borders.
- Stitch MCP System Rule:** All UI components generated via the Stitch MCP server must strictly utilize TailwindCSS utility classes and standard shadcn/ui primitives.

2. Color Palette & Design Tokens

Category	Token Name	Hex Code	Usage & UI Context
Background (Dark)	bg-dark-canvas	#090d16	Main application canvas in Dark Mode.
Surface / Card	bg-dark-surface	#131c2e	Dashboard cards, modals, and detail drawers.
Brand Primary	brand-primary	#2563eb	Primary action buttons, active navigation states, interactive links.
Critical Severity	severity-critical	#ef4444	Exposed keys, public S3 buckets, root MFA disabled badges/alerts[cite: 1].
High Severity	severity-high	#f97316	Overly permissive IAM roles, unencrypted databases[cite: 1].
Medium Severity	severity-medium	#eab308	Stale IAM keys (>90 days), missing log retention policies[cite: 1].

Category	Token Name	Hex Code	Usage & UI Context
Low Severity	severity-low	#3b82f6	Informational configuration drift or minor best-practice flags[cite: 1].
Passed / Compliant	status-passed	#22c55e	100% compliance checks passed, secure status badges[cite: 1].

3. Typography & Font System

- **Primary UI Font:** `Inter` , `-apple-system` , `sans-serif` (Clean, highly legible at small font sizes).
- **Code & IaC Snippets Font:** `JetBrains Mono` , `Fira Code` , `monospace` (Used for AWS ARNs, Terraform code fixes, CLI commands)[cite: 1].
- **Type Scale Hierarchy:**
 - Display / Score : 36px / Bold (e.g., ThreatScore Gauge "84/100")[cite: 1]
 - Header 1 (Page Titles) : 24px / SemiBold
 - Header 2 (Card Titles) : 18px / Medium
 - Body Regular : 14px / Regular (Table rows, description text)
 - Caption / Badges : 12px / Medium (Pills, timestamp labels, severity chips)

4. Component Styling & Patterns

Cards & Containers

- **Border Style:** Thin 1px border using `border-slate-800` (Dark) or `border-slate-200` (Light).
- **Corner Radius:** `rounded-lg` (8px radius) for widgets; `rounded-xl` (12px radius) for modals.
- **Elevation / Shadow:** Subtle ambient drop-shadow (`shadow-sm`). Avoid heavy, distracting shadows.

Buttons & Interactive Elements

- **Primary CTA (Scan / Fix):** Solid Cyber Blue (`bg-blue-600 hover:bg-blue-500 text-white`) with focus ring[cite: 1].
- **Remediate / Auto-Fix CTA:** Destructive/Accent subtle glow (`bg-red-500/10 text-red-400 border border-red-500/30 hover:bg-red-500/20`)[cite: 1].
- **Secondary / Outline:** Transparent background with border (`border-slate-700 hover:bg-slate-800 text-slate-200`).

Data Tables & Severity Badges

- **Table Layout:** Compact padding (`py-3 px-4`), sticky table headers, zebra hover effect (`hover:bg-slate-800/50`).
- **Inline Severity Pills:** Rounded full pills (`rounded-full px-2.5 py-0.5 text-xs font-semibold`) with 10% background opacity matching border and text colors (e.g., Critical: `bg-red-500/10 text-red-400 border border-red-500/20`)[cite: 1].

5. Dashboard Layout Architecture

The main dashboard (`SCR-03`) uses a structured 12-column responsive grid layout[cite: 1]:

- **Top Banner (Row 1 - Full Width):** Account Context Header, Quick Scan Trigger button, and Overall ThreatScore Radial Gauge (0-100 score)[cite: 1].

- **Key Metrics (Row 2 - 4 Columns):** 4 stat-cards showing *Critical Risks Count*, *Active AWS Accounts*, *CIS Compliance %*, and *DPDPA Compliance %*[cite: 1].
- **Risk & Compliance Analytics (Row 3 - 8 cols / 4 cols split):**
 - *Left 8 Cols:* Compliance Framework Progress Bars (CIS AWS, DPDPA, GDPR, ISO 27001)[cite: 1].
 - *Right 4 Cols:* Risk Severity Distribution Donut Chart (Critical, High, Med, Low)[cite: 1].
- **Urgent Action Items (Row 4 - Full Width):** Top 5 Critical Misconfigurations Table with instant **"View Fix"** drawer triggers[cite: 1].

6. Mobile & Desktop Responsive Behavior

- **Desktop (≥ 1024px):** Fixed 256px collapsible left sidebar, multi-column dashboard widgets, side-drawer overlays for finding details[cite: 1].
- **Tablet (768px - 1023px):** Sidebar collapses to 64px icon-only rail; 2-column grid reflow for stat widgets.
- **Mobile (< 768px):** Sidebar turns into a slide-over mobile sheet menu; data tables convert to swipeable card lists with sticky filter bar at top.

7. User Experience Principles (UX Directives)

1. **Alert Noise Reduction:** Group duplicate findings by cloud service/region to prevent "Alert Fatigue"[cite: 1]. Highlight the top 5 issues that eliminate 80% of total risk first[cite: 1].
2. **Actionable Over Descriptive:** Every finding card MUST display immediate solution code (Terraform / AWS CLI) alongside the risk explanation[cite: 1].
3. **Frictionless Role Views:** Automatically adapt UI density based on user role (e.g., show code/CLI tools to DevOps engineers; show compliance charts and PDF export options to Auditors)[cite: 1].

8. Stitch MCP Server Prompt Specifications

Use these exact prompt templates when invoking the **Stitch MCP Server** to generate application components:

Stitch Prompt 1: Global Security Dashboard Shell

```
stitch_generate_component --name "GlobalSecurityDashboard" --prompt "Create a dark-mode enterprise cloud security dashboard for CloudGuard GRC using TailwindCSS and React. Include a top bar with an account switcher and 'Run On-Demand Scan' button. Top section features a ThreatScore radial gauge (84/100) and 4 metric cards (Critical Risks: 2, AWS Accounts: 3, CIS Score: 82%, DPDPA Score: 90%). Middle section includes a compliance framework progress list (CIS AWS, DPDPA, GDPR) and a severity donut chart. Bottom section shows a findings table with severity pills (Red for Critical, Orange for High) and a 'View Fix' button on each row. Background should be #090d16 and card surfaces #131c2e with border #1e293b."
```

Stitch Prompt 2: Finding Detail & Remediation Drawer

```
stitch_generate_component --name "FindingDetailDrawer" --prompt "Build a slide-over drawer component for a cloud security finding: 'Unencrypted S3 Bucket: data-archive'. Include a Critical Red badge, mapped compliance frameworks (CIS AWS 2.1.1, DPDPA Sec 8), resource ARN string, and a tabbed remediation section ('AWS CLI', 'Terraform Code'). The Terraform tab must render a syntax-highlighted code block with a 'Copy Code' button. Include a primary action button 'Auto-Remediate (Lambda)' and a secondary button 'Mark as Suppressed'."
```

Stitch Prompt 3: Compliance Framework Matrix View

```
stitch_generate_component --name "ComplianceMatrixView" --prompt "Design a GRC compliance report page for DPDPA and CIS AWS benchmarks. Include a top header with 'Overall Compliance Score: 85%' and an 'Export Audit PDF' button. Render a data grid where rows represent security controls (e.g., '1.1 Root Account MFA Enabled', '2.1 S3 Bucket Encryption') and columns show Pass/Fail badges per AWS account. Use green pills for Pass and red pills for Fail with hover tooltips."
```
